UNIVERSITY OF MARYLAND

COMMENCEMENT • DECEMBER 20 & 21, 2008

Congratulations on your graduation from the University of Maryland! This milestone should bring great satisfaction to you, your family and friends. It is no small feat. I know that your feelings about your Maryland experience will blossom in the years ahead.

Your time at the university has been filled with new ideas, challenges and opportunities. You have probably discovered that the greatest learning comes from asking the right questions. The hardest questions, of course, have no "right answers," but they are the important steps toward understanding. You will find this realization important in your life ahead.

The University of Maryland has offered you opportunities to expand your interests and horizons. I hope that you took full advantage of them and that they have opened your eyes and many doors, too. You have made friends and found mentors who will continue to add value to your life in remarkable ways.

As you leave us, I would like you to know how much the faculty and staff respect your accomplishments as scholars, artists, athletes and leaders. You have enriched our university's life and have helped it to climb to higher levels of distinction. We welcome you into the alumni family, a truly special group.

I hope that you will stay connected to us and take full advantage of the benefits of being an alum. Stay involved with us and help new generations of students develop their futures. You can do this by returning to campus often, starting with Maryland Day 2009, on April 25.

You have my very best wishes for all your future plans. We are proud of each and every one of you. Stay in touch. Go Terps!

Yours sincerely,

C. D. Mote, Jr.

President

Alma Mater

Hail! Alma Mater

Hail to thee, Maryland!

Steadfast in loyalty,

For thee, we stand,

Love for the Black and Gold

Deep in our hearts we hold,

Singing thy praise forever,

Throughout the land.

Maryland's Momentum

Some recent highlights that identify the University of Maryland as a world-class institution with an impact on scientific discovery, education, and the performing and creative arts:

Rankings: Maryland ranks 37th worldwide among research universities, according to a survey by Shanghai's Jiao Tong University. And the 2008 *U.S. News & World Report* rankings put Maryland in the Top 20 of public research universities, with 31 of our academic programs in the Top 10 and 86 in the Top 25.

Faculty: Our faculty regularly earn national and inter national recognition for their excellence. Maryland currently has three Nobel laureates, seven Pulitzer Prize recipients and more than 30 members of the most prestigious national academies.

Private Giving: We've passed the halfway mark—\$557 million and counting—in *Great Expectations*. The Campaign for Maryland. A priority goal in the \$1 billion campaign is to raise more than \$350 million for student scholarships.

Going Green: Last spring, the University of Maryland became a charter member of the American College & University Presidents Climate Commitment, pledging to significantly reduce greenhouse gas emissions and to move toward a goal of carbon neutrality. As part of this commitment to sustainability, the university recently completed the first comprehensive greenhouse gas inventory of campus.

Information Advantage: Our new iSchool, Maryland's highly ranked College of Information Studies, pioneers research and problem solving on human-computer interaction, information search and retrieval, computer interfaces that are designed with children in mind, and more.

M Square Update: In early 2009, the National Oceanic and Atmospheric Administration Center for Weather and Climate Prediction will open in M Square, the university's 124-acre research park. This new facility will join university researchers with government experts to study weather prediction and climate change.

Pioneering Public Health: A School of Public Health was established in 2007, serving state and national public health needs for research in several critical areas. The school's Herschel S. Horowitz Center for Health Literacy will advocate for improved health literacy and the elimination of health disparities and for health literacy research and education.

Students Shine Bright: Our Mock Trial Team took first place in the American Mock Trial Association's national championship, while Maryland's Academic Quiz Team won the National Academic Quiz Tournament Division I contest, beating out more than two dozen competitors. Another team of undergraduates, in only its second year of competition, won first place for its design, construction and use of an autonomous submersible vehicle capable of navigating realistic underwater missions.

On Stage and Off: The Grammy-winning Kronos Quartet's residency at the Clarice Smith Performing Arts Center continued this fall, including two concerts offered as part of UM's "A Semester on War and the Representation of War" and extensive work with School of Music students and faculty. The ensemble's residency began in September 2007 and will continue through the 2009–2010 season.

Dear Graduates,

On behalf of the Maryland Alumni Association, I am thrilled to extend heartfelt congratulations upon achieving this academic milestone. Today, when you reach for your diploma, you will receive a torch—the legacy of excellence that Maryland alumni have carried for more than 150 years. We know you will hold it high, displaying your Terrapin pride for all to see.

It is my hope that in the years to come you will make the university proud by enlightening us. Share with your alma mater your newfound expertise and ideas. In turn, Maryland will continue to educate the country's brightest students, pursue cutting-edge research, explore the arts and defend our athletic titles—we will make you proud to be a Terp.

Along with this commitment, the alumni association is pleased to give you a complimentary one-year association membership as a graduation gift.

Alumni association membership provides instant access to:

- social and professional networking events at the Samuel Riggs IV Alumni Center, your new home address at the university
- health insurance and financial services—tangible benefits designed to ease your transition into life after college
- *Terp* magazine, connecting alumni with the university

Most importantly, it demonstrates your dedication to Maryland and those who will follow in your footsteps.

Best of luck to you, and thank you for displaying your Terp spirit as you take your place in our alumni family. We look forward to seeing you soon at the Riggs Alumni Center.

Sincerely,

Danita D. Nias '81

Assistant Vice President, Alumni Relations and Development

Sergio Guerra

Sergio Guerra is building upon his parents' dreams. His family fled civil war in Angola, where gunfire exploded his father's eardrums. After emigrating to the poor industrial town of Elizabeth, N.J., his father earned an associate's degree and his mother earned her GED while pulling double shifts at a factory. Guerra followed their example and pursued education as well, rather than succumb to the poverty and violence surrounding him.

"I chose to take the hand my parents had offered me ... and make something of myself as they had so passionately urged me to do as I was growing up," he says.

Choosing Maryland over the University of North Carolina and Boston University, the anthropology major has relied on intelligence, hard work and self-discipline to not only succeed but also excel.

As one of the top students in Maryland's demanding Honors Program, Sergio has achieved a nearly flawless grade point average while juggling a part-time job. In the middle of this past semester, he stepped in as a teaching assistant for Introduction to Biological Anthropology.

His efforts have garnered him recognition on the Dean's List and a Presidential Award for Excellence in Academics.

Outside the classroom, Sergio captains a club soccer team and volunteers for work on cancer studies. Fluent in Spanish, French and Portuguese, he is also a member of the Portuguese Language Association.

In January, he will travel to Angola as part of a research project examining a link between salt and stroke. The study will compare samples from Angola with samples from African Americans in lowland North Carolina.

Sergio's post-graduation plans also include an internship with a pharmaceutical research company and graduate school. Ultimately he plans to earn a doctorate in forensics, considering Johns Hopkins and New York universities for graduate studies.

"I have faced opposition and hardships my entire life and have no doubt that I will become everything I've ever wanted to be," he says. "As they say, 'Life's what you make it,' and I'm giving it all I've got."

John C. Mather's sojourn among the stars has proven a boon for mankind and its quest to understand the origin of the universe.

A senior astrophysicist in the Observational Cosmology Laboratory at NASA's Goddard Space Flight Center and adjunct professor at the university, Mather led a 1,000-person team that conducted satellite-based experiments, which strengthened support for the Big Bang theory.

NASA's Cosmic Background Explorer satellite, or COBE, measured latent radiation dating from the universe's formation an estimated 13+ billion years ago. Three years after the Explorer's launch in 1989, the team announced that it had found within that radiation a clue for how clusters of galaxies formed, stretching hundreds of millions of light years across the universe. The discovery earned Mather and University of California, Berkeley researcher and professor George F. Smoot the 2006 Nobel Prize in physics.

Born in Roanoke, Va., he received a bachelor's degree in physics from Swarthmore College in Pennsylvania and a doctorate in physics from the University of California, Berkeley.

Mather serves as senior project scientist for the James Webb Space Telescope. Scheduled for launch in 2013, it is being developed as the successor to the Hubble Space Telescope.

He has been appointed to advisory and working groups for the National Academy of Sciences, the National Science Foundation and the Center for Astrophysical Research in the Antarctic.

Mather's awards include a NASA Distinguished Service Medal (2007); the Robinson Prize in Cosmology; Newcastle University (2006–07); and the Rumford Prize from the American Academy of Arts and Sciences (1996).

He holds professional memberships with the National Academy of Sciences, the American Academy of Arts and Sciences, the American Astronomical Society, the American Physical Society and the American Institute of Aeronautics and Astronautics.

His 1996 book, *The Very First Light*, chronicles the design and launch of COBE. In 2007, *Time* magazine listed him among its "100 Most Influential People in the World."

When asked what advice he would offer Maryland graduates, he responded: "My personal code is life is too long not to do what you want. It's too short not to do what you want. So find out what you want and give it your heart, and who knows what wonders may be in store?"

John C. Mather

A Continuing Commitment to Excellence

From its pre-Civil War roots as the state's first agricultural college and one of America's original land grant institutions, the University of Maryland has emerged as a public research university of national stature, highly regarded for its broad base of excellence in teaching and research. Maryland's beautiful 1,200-acre campus is in the heart of the I-270 research corridor that is fueling a burgeoning information technology and biotechnology industry.

The momentum of recent years has poised the university to take leadership in shaping the research university of the 21st century. By virtually every measure of quality, the University of Maryland has gained national recognition as one of the fastest rising compre-

hensive research institutions in the country. Maryland is one of the nation's Top 20 public national universities, and the quality of our faculty—with three Nobel laureates, seven Pulitzer Prize winners and scores of Fulbright scholars—is among the finest of any research university in the United States.

There are 13 schools and colleges within the organizational structure of the University of Maryland. Seven of these units—the Smith School of Business, the College of Education, the Clark School of Engineering, the Philip Merrill College of Journalism, the College of Computer, Mathematical and Physical Sciences, the College of Information Studies and the School of Public Policy—have been recognized by their peers and in various rankings as among the 25 best in the nation.

The breadth of this excellence is a source of pride for students, faculty and staff, and is endorsement for the university's flagship status among the state's institutions of higher education.

The university also continues to move forward in the quality of our students and the support of our faithful alumni. Freshman admission is increasingly competitive. More than 28,150 freshman applications were received for just over 4,000 spots in the Fall 2008 entering class.

Once accepted students complete their academic journey, they will join a rapidly increasing family of alumni who are proud to be called Terps. Maryland Alumni Association membership has grown to more than 30,000 dues paying members since its inception in 1989.

The university's commitment to quality education in a research environment is key to its academic reputation and the success of its graduates. More than 100 centers and institutes are engaged in research and outreach. The research enterprise infuses the curriculum at both the undergraduate and graduate levels, exposing students to the most pressing issues and challenges in their discipline and training them to respond with rigor as well as creativity to contemporary problems.

Faculty at the University of Maryland, in all fields of knowledge, are engaged at the highest levels of national and international

concern. The university's location near the center of federal policymaking and international political and economic activity enables it to play an active role in research and analysis of public policy. Strong links to the scientific and technological agencies and organizations of the federal government drive research in the environment, engineering, physics, computer science, life sciences and agriculture. Scholarship in the arts, humanities and social sciences is marked by the spirit of intellectual diversity and interdisciplinary collaboration.

Maryland is one of the research universities in the prestigious 61-member Association of American Universities and the only public institution in the Maryland-D.C. area with membership in the nation's most distinguished honor society, Phi Beta Kappa.

Total sponsored research and outreach revenue for fiscal year 2008 topped \$400 million. These funds for research, training and outreach come from a variety of sources including the federal government, state government, corporations and foundations.

The Office of Technology Commercialization (OTC) at the University of Maryland was established in late 1986 to facilitate the transfer of information, life and physical science inventions developed at the university to business and industry. In its 22-year history, OTC has recorded more than 1,700 technologies, secured more than 325 patents and licensed more than 900 technologies, generating more than \$16.3 million in technology transfer income. OTC collaborates with university offices such as the Maryland Technology

Enterprise Institute, the Technology Advancement Program, the Small Business Development Center and the Dingman Center for Entrepreneurship. These partnerships demonstrate the university's broad range of technology transfer services, research and development funding, partnering opportunities and entrepreneurial capabilities to the local community, industry and government.

History

The University of Maryland was founded in 1807 in Baltimore as a faculty-owned College of Medicine. The medical school was considered one of the top schools in the country, attracting notable professors and lecturers from throughout the world. In its beginning, tuition cost \$140, grades were sent home weekly to parents, and students could obtain room and board for \$300 annually.

Five years later, the growing institution was renamed the University of Maryland. Despite the name, the university was not considered a state institution as it was still owned and operated by faculty. Baltimore College of Dental Surgery, the first dental school in the world, became a part of the university in 1840, awarding the first Doctor of Dental Surgery degree in 1841.

In 1859, the Maryland Agricultural College, which would evolve into the University of

Maryland, College Park, was opened under a charter secured by a group of Maryland planters in 1856. In addition to spending one hour each day hoeing or plowing on the college farm, students took a broad range of courses in ancient and modern languages, natural sciences, English and mathematics. After a disastrous fire on campus in 1912, the state acquired the college and rebuilt it.

In 1920, the state legislature combined the College Park institution with the professional schools in Baltimore to form an expanded University of Maryland. The entity eventually grew to include campuses in Baltimore County, the Eastern Shore and University College, a continuing education institution.

The following decades saw the increasing growth of student population, excellence in programs and curricula, and the burgeoning of the University of Maryland, College Park, into a nationally recognized research institution.

July 1, 1988, marked the dawn of a new era in higher education in the state of Maryland, as the five components of the university were merged with six other state universities and colleges to form the University System of Maryland, and College Park secured its flagship status with a mandate to become one of the pre-eminent research universities in the nation.

The Alumni Association

With alumni clubs from Miami to Taipei, Taiwan, the Maryland Alumni Association strives to keep and strengthen ties between the university and its graduates.

Member events such as pre-game parties; bull roasts; picnics; golf tournaments; dinner cruises; and subscriptions to *Terp*, the University of Maryland magazine, help keep alumni connected to the university and to each other. All graduating seniors and successful master's and doctoral candidates receive a one-year free membership in the Maryland Alumni Association.

The Alumni

The Maryland Alumni Association's Hall of Fame honors university graduates who have brought honor to their alma mater through distinguished careers in a variety of disciplines. The following 51 individuals have shown the world what it means to be a Terp.

Carmen Balthrop '71

World-Class Soprano

Educator and Entrepreneur

Gary Williams '68

Championship-Winning Coach

Morgan Wooten '56

Basketball Hall of Fame Member

The Hall of Fame induction ceremony takes place once every five years, with the last group of honorees inducted in June 2005.

Customs of Commencement

Early commencement ceremonies at the University of Maryland were marked with great fanfare and celebration. The faculty gave huge banquets for the graduates the night before the event. The following morning, crowds gathered to watch the young graduates parade. It was a gala social occasion, attracting not only friends and relatives, but the fashionable elite of the day. At the ceremony, prayers were recited, speeches were made, and honorary degrees were awarded to distinguished figures from across the country. Finally, as the audience cheered and threw flowers, the graduates came forward to collect their Latin-inscribed degrees.

Academic Costume

The black caps and gowns worn by the students and faculty in the academic procession have been the traditional costume of scholars since the Middle Ages. The ordinary dress of the scholar, whether student or teacher, was similar to that of a cleric. Caps and gowns were probably worn to keep students warm in unheated buildings. Many medieval scholars were tonsured, like monks, and hoods served to cover their shaved heads until the skullcap later took its place.

Even after the Civil War, most students at American universities wore caps and gowns daily while in residence. These varied in design until they were standardized by the

American Intercollegiate

Commission in 1894. At that time it was decided that all robes would be black. Colors on the trim of the gown were also standardized to indicate the scholar's academic discipline.

A list of department colors follows:

Agriculture: Maize
Arts, Letters, Humanities: White
Business Administration, Commercial Science: Drab
Dentistry: Lilac
Economics: Copper
Education: Light Blue
Engineering: Orange
Fine Arts, Architecture: Brown
Forestry: Russet
Home Economics: Maroon
Journalism: Crimson
Law: Purple
Library Science: Lemon
Medicine: Green
Music: Pink
Nursing: Apricot
Oratory, Speech: Silver Gray
Pharmacy: Olive
Physical Education: Sage Green
Philanthropy: Rose
Philosophy: Dark Blue
Public Administration, Foreign Service: Peacock Blue
Public Health: Salmon
Science: Golden Yellow
Social Work: Citron
Theology and Divinity: Scarlet
Veterinary Sciences: Gray

The tassel may also be colored to represent an academic discipline

or it may be black. Officially, the tassel is permitted "to lie where it will" on the mortarboard. However, numerous institutions have adopted the practice of having degree candidates wear the tassel on the right front side at the start of the commencement ceremony and then shift them to the left side after degrees are awarded.

Student Marshals

Elected through a nomination process, student marshals are senior leaders who play an important role in the graduation ceremony. Student marshals assist in organizing the thousands of graduates, leading them smoothly through the commencement procession. They also supply extra caps and hoods, and bobby pins to keep headwear secure. December 2008 marshals are listed on page 68 of this booklet.

Senior Gift

This year's gift is the renovation of the Morrill Quad (in the center of Morrill, Tydings, LeFrak, Taliaferro and Shoemaker Halls). In front of Morrill Hall, the campus' oldest building, is the site of the original campus quadrangle; it is being redeveloped to help preserve the history of the University of Maryland. The Class of 2008–2009 has chosen to honor one of our campus' oldest treasures with one of our campus' oldest traditions.

If you would like to be a part of this tradition of philanthropy

by donating to the Senior Class Gift call 301.314.GRAD for more information.

Academic Degrees

A degree is awarded for the successful completion of a course of study. There are more than 1,600 different academic degrees currently conferred by colleges and universities nationwide. The University of Maryland offers degrees in 127 undergraduate majors, 75 doctoral programs, 101 master's programs and one first professional degree.

The Doctor's Degree

The doctor's degree represents the most advanced earned degree conferred by American institutions. There are two distinct types: the practitioner's degree and the research degree. The first type represents advanced training for the practice of various professions, principally Doctor of Medicine, Juris Doctor, Doctor of Pharmacy and Doctor of Veterinary Medicine. These degrees do not involve the completion of original research by the student. The University of Maryland, at the professional school in Baltimore, awarded the first two dental degrees ever on March 9, 1841, and invented the name of the degree, Doctor of Dental Surgery.

The University of Maryland conveys the Doctor of Veterinary Medicine to approximately 90

students each year in a program that was instituted in 1980. Graduates receive a diploma containing the seals of both the University of Maryland and its partner institution, the Virginia Polytechnic Institute and State University.

The second type is the research doctorate representing prolonged periods of advanced study. A dissertation that usually accompanies the study is intended to contribute substantially to the body of knowledge on the subject. The most important of these, the Doctor of Philosophy, no longer has an implication of philosophy for its holder, but represents advanced research in any of the major fields of knowledge. It was first awarded in the United States in 1861 by Yale University. The University of Maryland awarded a Ph.D. for the first time in 1920.

The Master's Degree

The master's degree is an academic honor bestowed upon students who have successfully completed work beyond the baccalaureate.

A thesis and an oral examination are usually required. In 1920, the University of Maryland awarded its first Master of Arts and Master of Science degrees in fields other than agriculture.

The Bachelor's Degree

The bachelor's degree represents the completion of a four-year course of college-level study and is the oldest academic degree awarded by American institutions of higher learning. It was first conferred in America in 1642 on the first nine graduates of Harvard College. Maryland Agriculture College, which later became the University of Maryland, College Park, awarded its first Bachelor of Arts and Bachelor of Science in 1862.

The December 2008 class roster comprises degree candidates from the graduate and undergraduate programs at the University of Maryland, College Park. As final action cannot always be taken for candidates by the time this program is printed, the list of candidates here is tentative. The university reserves the right to withdraw or add names. Diplomas (for other than doctoral degrees) will be mailed by the Office of Records and Registration.

Bachelor's degree candidates who have qualified for scholarship honors upon graduation are designated by appropriate symbols adjacent to their names within the alphabetical listing of colleges or schools, pages 28–33 and 49–63.

To be eligible for consideration for such honors a candidate must meet the following general criteria: (1) have completed at least two years of work at the University of Maryland (60 semester hours, 30 of which were earned at the College Park campus) and (2) have a scholastic average of a “B” (grade point average of 3.0) or higher in the University of Maryland work prior to the last semester of registration before the awarding of a degree.

Degree candidates who have met these criteria are shown in the listings as qualifying, upon graduation, for the designations *Summa cum Laude* (if they ranked in the top 2 percent of the candidates in their respective colleges or schools), *Magna cum Laude* (if in the next 3 percent), or *cum Laude* (if in the next 5 percent) based on the grade point averages of students in the preceding three graduating classes of their degree-granting unit.

Global Communities Scholars

Under the Office of International Programs, students earn a transcript notation of Global Competency through scholarship in the areas of intercultural communication, global issues and international research or service learning. Scholars wear a symbolic globe medallion on a light-blue ribbon.

Zeynep Sumer

Language House

Created in 1989, it was the first living-learning program established. It provides students the opportunity for language and cultural immersion in a clustered, organized study environment.

Matt Robertson (French)
Liz Campbell (German)
Jeff Smith (German)
Deborah Felsenthal (Hebrew)
Nathan Cohen (Hebrew)
Estela Martinez (Spanish)

Philip Merrill Presidential Scholars

Scholars were nominated by the colleges and represent the university's most successful seniors. The program also honors the university faculty member and K-12 teacher named by each student for their mentorship. Scholars will be wearing red braids on their robes.

The Senior Marshal Program began in 1991 as an opportunity to acknowledge outstanding seniors at their commencement. The students selected to be marshals were nominated by faculty, administration and staff for their outstanding accomplishments and contributions to the University of Maryland. We are proud to recognize these truly remarkable students.
